The presidents of Kentucky's eight public universities were removed from the Council by gubernatorial executive order in July, 1980.

MISSION STATEMENTS FOR KENTUCKY'S COMMUNITY COLLEGES AND UNIVERSITIES

Community Colleges

The University of Kentucky Community College System, consisting of twelve community colleges and a technical institute, shall provide traditional community college education to Kentucky students. The programming of the individual segments of the community college system should be developed in accordance with the availability of resources and with particular emphasis on the needs of the immediate community. It is expected that programming will vary from institution to institution as each community college responds to its situation. Thus, some community colleges will be comprehensive in nature while others will be more limited in scope.

In general, the community colleges shall offer a mix of programs designed to serve the general education, occupational, and continuing education needs of the immediate community with certain restrictions. Neither the community colleges nor community college components within four-year universities should offer certificate programs of less than the associate degree level unless such programs are an integral part of associate and baccalaureate programs. Associate degree programs which are high cost and designed to meet specific but limited manpower needs of the Commonwealth should be designed to rotate among the community colleges in the system as the need for and interest in the program increases/declines in a particular community. Unique technical programs which are underenrolled should be made available to interested students regardless of the institution in which they are enrolled while certain highly technical discipline-specific continuing education offerings might be inappropriate undertakings for community colleges.

Community colleges shall provide student services such as career counseling, academic advising, and developmental studies in order to insure that students have an opportunity to achieve their needs, abilities, and aspirations.

Where community colleges are located proximate to other higher education and/or postsecondary institutions, they should foster close working relation-

ships and develop articulation agreements with those institutions. Community colleges are encouraged to develop, where practical, joint programs with vocational schools which promote the sharing of existing facilities and capabilities while upgrading the level of instruction.

Kentucky State University

Kentucky State University shall serve as a residential institution with a range of traditional collegiate programs appropriate to its size and resources. In addition, the University should focus on the special needs of state governmental employees and the expanding needs of state government. Associate and baccalaureate degree programs should be oriented toward career opportunities and related human and public service delivery and governmental services.

At the master's degree level, the University should emphasize public administration curricula to meet the needs of state government. These programs should be carefully articulated with related doctoral programs at the University of Kentucky. Kentucky State should continue its work in cooperative extension programs with the University of Kentucky.

The University's historic role in the education of Blacks is recognized, and Kentucky State should expand its efforts to build a library of pertinent historical materials.

Eastern Kentucky University

Eastern Kentucky University shall serve as a residential, regional university offering a broad range of traditional programs to the people of central, eastern, and southeastern Kentucky. Recognizing the needs of its region, the University should provide programs at the associate and baccalaureate degree levels, especially programs of a technological nature.

Subject to demonstrated need, selected master's degree programs should be offered, as well as the specialist programs in education. A retrenchment or elimination of duplicate or nonproductive programs is desirable, while development of new programs compatible with this mission is appropriate.

The University should continue to meet the needs in teacher education in its primary service region and

should provide applied research, service, and continuing education programs directly related to the needs of its primary service region.

Because of the University's proximity to other higher education and postsecondary institutions, it should foster close working relationships and develop articulation agreements with those institutions. The University should develop cooperative applied research and teaching programs using resources such as Lilly's Wood and Pilot Knob Sanctuary and Maywoods.

Morehead State University

Morehead State University shall serve as a residential, regional university providing a broad range of educational programs to the people of northern and eastern Kentucky. Recognizing the needs of its region, the University should offer programs at the associate and baccalaureate degree levels which emphasize the traditional collegiate and liberal studies. Carefully selected two-year technical programs should be offered as well.

Subject to demonstrated need, selected master's degree programs as well as the specialist programs in education should be offered. A retrenchment or elimination of duplicative or nonproductive programs is desirable, while development of new programs compatible with this mission is appropriate.

The University should continue to meet the needs of teacher education in its primary service region and should continue to develop programs to enhance the economic growth in Appalachia. The University should provide applied research, service, and continuing education programs directly related to the needs of the primary service region.

Because of the University's proximity to other higher education and postsecondary institutions, it should foster close working relationships and develop articulation agreements with those institutions.

Murray State University

Murray State University shall serve as a residential, regional university offering a broad range of educational programs to the people of western Ken-

tucky. Recognizing the needs of its region, the University should continue to offer programs at the associate and baccalaureate degree levels which emphasize the traditional collegiate and liberal studies.

Subject to demonstrated need, selected master's degree programs should be offered as well as the specialist programs in education. A retrenchment or elimination of duplicative or nonproductive associate degree programs is desirable, while development of new programs compatible with this mission is appropriate.

The University should continue to meet the needs in teacher education in its primary service region and should provide applied research, service, and continuing education programs directly related to the needs of its primary service region.

Because of the University's proximity to other higher education and postsecondary institutions, it should foster close working relationships and develop articulation agreements with those institutions. The University should develop cooperative applied research and teaching programs using the unique opportunities available at Murphey's Pond and the Kentucky Lake Biological Station.

Northern Kentucky University

Northern Kentucky University shall serve students living in its immediate environs and offer a broad range of educational programs which emphasize the traditional collegiate and liberal studies. Recognizing the needs of its region, the University shall provide programs primarily at the associate and baccalaureate degree levels.

Subject to careful justification, selected master's degree programs, as approved by the Council on Higher Education, may be offered. The provision of broader graduate education services shall be provided by a graduate education center at Northern Kentucky University in which the participation of one or more advanced graduate education universities is arranged through Northern.

The University should continue to offer health and selected technical programs because it serves as a community college for the area.

Because of its close proximity to other higher education and postsecondary institutions, Northern

should foster close working relationships and develop articulation agreements with those institutions. The University should provide applied research, service, and continuing education programs directly related to the needs of its primary service region.

The development of a community studies center encouraging applied research and public service activities would provide a unique opportunity for cooperating with other institutions and for service in the northern Kentucky area.

Western Kentucky University

Western Kentucky University shall serve as a residential, regional university offering a broad range of traditional programs to the people of south central and portions of western Kentucky. Recognizing the needs of its region, the University should provide programs at the associate and baccalaureate degree levels, especially programs of a technical nature.

Subject to demonstrated need, selected master's degree programs should be offered as well as the specialist programs in education. A retrenchment or elimination of duplicative or nonproductive programs is desirable, while development of new programs compatible with the mission is appropriate.

The University should continue to meet the needs in teacher education in its primary service region and Should provide applied research, service, and continuing education directly related to the needs of its primary service region.

Because of the limited community college opportunities in the service region, the University should develop its Bowling Green Community College component, emphasizing technical programs. The University should develop close working relationships and develop articulation agreements with other institutions.

University of Louisville

The University of Louisville shall be a major university located in the largest urban area and shall meet the educational, research, and service needs of its metropolitan area with a broad range of programs at the baccalaureate and master's levels. The Univer-

sity of Louisville shall continue to offer those doctoral degree and postdoctoral programs related to the health sciences. The University of Louisville will continue to share with the University of Kentucky a statewide mission in medicine, dentistry, law, and urban affairs. However, the financial resources of the Commonwealth are limited. Kentucky cannot afford to develop two comprehensive programs at the doctoral level, currently and in the future. Therefore, at the doctoral level, the University of Louisville may offer a limited number of carefully selected programs which are not unnecessarily duplicative and which are relevant to the needs of its metropolitan service area. Doctoral programs not consistent with this statement shall be phased out as soon as practical, with due regard to the interests of students already enrolled and to faculty and staff employed therein. In the health sciences, close coordination with the University of Kentucky must be maintained.

While it may be necessary for other institutions to offer certain programs therein, the specific responsibility to satisfy the broad range of undergraduate, master's, and special needs of the residents of the metropolitan service area of Louisville and Jefferson County rests with the University of Louisville. Careful articulation of academic programs at Jefferson Community College and the University of Louisville should be developed to enhance educational opportunities in the Louisville and Jefferson County metropolitan service area.

University of Kentucky

The University of Kentucky shall be the Commonwealth's only statewide institution. It shall serve as the principal graduate-degree-granting university in the system and as the principal institution for statewide instruction, research and service programs in all fields without geographical limitation.

By virtue of these responsibilities, the University shall serve as a residential institution and maintain a wide range of academic programs at the baccalaureate, master's, and doctoral degree levels, with professional programs as approved by the Council on Higher Education. Because of its designation as the principal research, service, and graduate institution, the University shall emphasize the

development of its graduate, professional, research, and service programs. It is essential to the success of the entire system that the University shall exert maximum effort for cooperative doctoral programs with other universities in the Commonwealth and cooperate in applied research and service with other institutions. In the health sciences, close coordination with the University of Louisville must be maintained. This emphasis may require retrenchment of some programs and limitations on undergraduate enrollment at the Lexington campus.

KENTUCKY STATUTES AND EXECUTIVE ORDERS CONCERNING THE POWER AND DUTIES OF THE COUNCIL ON HIGHER EDUCATION

EXECUTIVE ORDER 80-533 of July 8, 1980, issued by Governor John Y. Brown, Jr., which affects KRS 164.010 and KRS 164.020:

(1) The Council on Higher Education is hereby reestablished and shall consist of fifteen members appointed by the Governor. The Superintendent of Public Instruction shall also serve, ex officio, as a non-voting member of the Council. The president or chief executive officer of each four-year state institution of higher education in the state shall serve on an advisory committee to the Council which shall meet upon its call.

(2) Seven (7) members of the Council shall be appointed to represent each of Kentucky's Congressional Districts. Eight members of the Council shall represent the state at large. The terms of membership shall be six years, as provided by Senate Bill 57 of the 1980 General Assembly, except that initial appointments shall be for staggered terms as provided in subsequent appointing Orders.

(3) The Council on Higher Education shall consider the requirements and review the budget request, which shall be prepared in the manner and submitted to the Council by dates prescribed by the Council, of the Kentucky Higher Education Assistance Authority as to their appropriate level of support considering its function and its respective need. The budget request of the Kentucky Higher Education Assistance

Authority, along with Council recommendations, shall be submitted to the Governor through the Department of Finance not later than November 15 of each odd-numbered year.

(4) The Council on Higher Education shall review the loan and grant policy of the Kentucky Higher Education Assistance Authority, pursuant to its authority to establish tuition and fees for the state universities, and pursuant to the Council's responsibility to insure that acts of the General Assembly related to private institutions of higher education and grant programs for students therein are carried out in an effective manner.

(5) In carrying out these and other functions mandated to the Council on Higher Education, including but not limited to those functions of the agencies and organizations being consolidated by this Order, the Council on Higher Education shall establish such advisory groups as may be necessary to satisfy any federal legislative or regulatory guidelines.

(6) The Secretary of the Department of Finance and the Commissioner of the Department of Personnel shall take all necessary and required action to effect this reorganization.

164.010. Council on higher education--Membership--Terms.--There shall be a council on higher education in Kentucky, to be composed of the superintendent of public instruction, one (1) member of the state board for elementary and secondary education, one (1) member of the state board for occupational education, ten (10) lay members appointed by the governor, and the president or chief executive officer of each four-year state institution of higher education in the state. The superintendent of public instruction and ten (10) lay members shall constitute the voting membership of the council. The lay members shall be appointed for regular terms of four (4) years, with the initial appointment of two (2) members for one (1) year, two (2) members for two (2) years, two (2) members for three (3) years and four (4) members for four (4) years. Whenever a lay member's term expires after July 15, 1980, the member appointed by the governor to fill the vacancy shall be appointed for a six (6) year term. Any person, other than the superintendent of public instruc-

tion, holding either an elective or appointive state office or who is a member of the governing board of any state or private college or university in Kentucky shall be ineligible for membership or appointment on the council during his membership or term of office. When the council meets to consider curricula for teacher education, three (3) persons who are from accredited institutions of higher learning, and who have been appointed by the executive committee of the Kentucky Association of Colleges, Secondary and Elementary Schools, shall be invited to meet with the council in an advisory capacity.

164.020. Powers and duties of council.-- The council on higher education in Kentucky shall:

(1) Engage in analyses and research to determine the overall needs of higher education in the Commonwealth.

(2) Develop and transmit to the governor comprehensive plans for public higher education which meet the needs of the Commonwealth. The plans so developed shall conform to the respective functions and duties of the state colleges and universities, the community colleges, and the University of Kentucky as provided by statute. The council shall for all purposes of federal legislation relating to planning be considered the "single state agency" as that term may be used in such federal legislation; provided, however, that when such federal legislation requires additional representation on any such "single state agency" the council on higher education shall establish such advisory groups as may be necessary to satisfy such federal legislative or regulatory guidelines.

(3) Determine the amount of entrance and/or registration fees and approve the qualifications for admission to the public institutions of higher education. In determining the entrance and/or registration fees for non-Kentucky residents, the council shall consider the fees required of Kentucky students by institutions in adjoining states, the resident fees charged by other states, the total actual per student cost of training in the institutions for which the fees are being determined, and the ratios of Kentucky students to non-Kentucky students comprising the enrollments of the respective institutions, and such

other factors as the council may in its sole discretion deem pertinent.

(4) Consider the requirements and review the budget requests, which shall be prepared in the manner and submitted by the institutions to the council by dates prescribed by the council, of the institutions of higher education as to their appropriate level of support considering the functions of the institutions and their respective needs. The individual institutions' budget requests, including tuition and registration fee schedules for all categories of students, along with council recommendations shall be submitted to the governor through the executive department of finance and administration not later than November 15 of each odd numbered year.

(5) Review and approve all capital construction projects the cost of which exceeds one hundred thousand dollars ($100,000) approved by the governing boards of the state-supported institutions of higher education prior to the institutions' submission of such projects to the executive department of finance and administration and/or state property and buildings commission.

(6) Require reports from the executive officer of each institution it deems necessary for the effectual performance of its duties.

(7) Publish annually a report of the educational and financial affairs of the institutions and disseminate other information relating to higher education.

(8) Define and approve the offering of all higher education associate, baccalaureate, graduate, and professional degree or certificate programs in the state-supported higher education institutions; review proposals and make recommendations to the governor regarding the establishment of new state-supported community colleges and new four-year colleges. Provided, nothing in KRS 164.010, 164.020, 164.125 and 164.290 to 164.295 shall be construed to grant the council on higher education authority to disestablish or eliminate any college of law which became a part of the state system of higher education through merger with a state college.

(9) Approve the teacher education programs in the public institutions.

(10) Elect a chairman annually from the voting

membership and appoint an executive director and such staff as may be needed and fix their compensation without limitation of the provisions of KRS chapter 18 and KRS 64.640 subject to the approval of the commissioner of personnel and the secretary of the executive department of finance and administration.

(11) Constitute the representative agency of the Commonwealth in all matters of higher education of a general and statewide nature which are not otherwise delegated to one or more institutions of higher learning. Such responsibility may be exercised through appropriate contractual relationships with individuals or agencies located within or without the Commonwealth. The authority includes but is not limited to contractual arrangements for programs or research, specialized training, and cultural enrichment.

(12) Develop procedures for the approval of a designated receiver to provide for the maintenance of student records of the public institutions of higher education and the colleges as defined in KRS 164.945, and institutions operating pursuant to KRS 165A.310 which offer collegiate level courses for academic credit, which cease to operate after July 15, 1980. Procedures shall include assurances that, upon proper request, subject to federal and state laws and regulations, copies of student records shall be made available within a reasonable length of time for a minimum fee.

164.022. Center for education statistics.--There is established in the council on higher education a Kentucky center for education statistics to serve as a coordinated, cooperative, and comprehensive data collection, storage, and utilization system for the overall planning for higher education in the Commonwealth.

164.024. Office of geriatrics-gerontology created in council--Administrator's qualifications--Duties.--(1). There shall be established in the council on higher education an office of geriatrics-gerontology. The office shall be administered by a recognized authority in such disciplines who shall have completed a doctoral degree in gerontology or

related disciplines with an emphasis in gerontology from an accredited college or university and who shall have a minimum of two (2) years of professional experience in working with older persons. If such authority with a doctorate degree in gerontology or related disciplines with an emphasis in gerontology cannot be located the office shall be administered by a recognized authority with a master's degree in gerontology or related disciplines with an emphases in gerontology from an accredited college or university and who shall have the minimum of two (2) years of professional experience in working with older persons. Such administrator shall be appointed by the governor from a list of three (3) nominees submitted by a committee composed of representatives from the University of Kentucky college of social professions, the University of Kentucky medical school, the University of Louisville, Kent school of social work, and the University of Louisville medical school.

(2) The office of geriatrics--gerontology shall stimulate the inauguration and continuance of courses in geriatrics and gerontology in the universities and community colleges funded by the Commonwealth of Kentucky.

(3) The administrator of the office shall cooperate with the medical schools, the schools of social work, the schools of nursing and such disciplines within the community colleges and universities as deemed applicable to educate the students therein concerning the processes of aging and the conditions, mental and physical, attendant upon aging. The office shall seek the cooperation of appropriate authorities within such universities and community colleges to draw from the several disciplines within each school to establish and conduct such courses. The administrator of the office shall be available for consultation to such universities and community colleges.

164.028. Office of professional education.--There shall be established in the council on higher education an office of professional education preparation programs. The office shall have as its principal responsibility the coordination, development, and implementation, through appropriate

means, of educational activities directed toward solving the problem of professional manpower distribution in the Commonwealth. For the purposes of KRS 164.028 to 164.029, the words "profession" and "professional" mean medicine and dentistry.

164.0281. Duties of office of professional education preparation programs.--The office of professional education preparation programs shall coordinate, promote and support activities designed to:

(1) Identify high school students and other individuals from designated underserved areas of the Commonwealth who have indicated an interest in, and demonstrated potential for pursuing professional careers;

(2) Provide special educational opportunities for such students to prepare themselves for admission to, and graduation from, professional schools;

(3) Provide extramural (off-campus) educational opportunities for professional students in rural and other designated underserved areas of the Commonwealth;

(4) Identify currently enrolled professional students, postgraduate trainees and residents who are deemed to have realistic potential for recruitment to practice in underserved areas of the Commonwealth;

(5) Provide for the intensive recruitment of such students and postgraduate trainees for practice in underserved areas;

(6) Provide technical assistance to communities in their professional manpower recruitment efforts.

164.0282. Duties of council on higher education as to professional education preparation programs.--The council on higher education shall:

(1) Employ a director and sufficient staff to administer the professional education preparation programs;

(2) Formulate guidelines and policies governing program activities and fund expenditures;

(3) Allocate funds to appropriate agencies, organizations, and institutions for the purpose of conducting activities approved in accordance with guidelines and policies;

(4) Recognize regional groups made up of professionals, educators, and consumers, which shall serve in an advisory capacity to the council in accordance with guidelines and policies;

(5) Recognize a group made up of professionals, educators and consumers which shall serve in an advisory capacity to the council on all program matters;

(6) Develop and maintain a mechanism for evaluating the impact of the program activities on admissions to, and graduation from, professional schools, and on professional manpower distribution;

(7) Conduct specific program activities which are beyond the capability of a single institution, agency, or organization, or when it is determined that it would be inappropriate for such institutions, agencies, or organizations to conduct the activity;

(8) Establish liaison with and provide assistance to the state board for elementary and secondary education and the state board for occupational education in developing counseling and other related programs to encourage students from shortage areas to prepare for professional careers;

(9) Coordinate the development of a financial support system to enable potential professional students in underserved areas which will enhance their ability to apply for, be admitted to, and graduate from professional education programs;

(10) Report at least annually to the appropriate committees and interim committees of the general assembly on the operation of the program.

164.0283. Publication of admissions criteria by public professional schools.--Every public institution of higher education in the Commonwealth of Kentucky offering professional education programs in the areas of medicine and dentistry shall establish and publish the criteria by which applicants for admission are evaluated and the approximate weight of each criteria including a criterion based upon permanent residence in underserved or underrepresented areas of the Commonwealth.

164.029. Recognition of area health education system.--The area health education system in the council on higher education is hereby recognized.

164.030. Regulations of council to be followed by state educational institutions.--The governing board of each of the state institutions of higher learning shall make such changes or adjustments in the curricula and such rules and regulations affecting their schools as are necessary to carry out and put into effect the rulings of the council on higher education in regard to curricular offerings, entrance fees and qualifications for admission to and reports from their respective institutions.

164.540. Council on higher education designated agency of state for purposes of regional compact--Restrictions concerning negroes.--(1) The council on higher education in Kentucky as defined in KRS 164.010 is hereby designated as the agency of the Commonwealth of Kentucky charged with the responsibility and vested with all necesseary authority, subject to the conditions and restrictions set out in subsection (2) of this section, to carry out the obligations, participate in the planning and negotiations, and administer the rights, benefits and privileges, devolving upon the Commonwealth of Kentucky and its citizens pursuant to the regional compact referred to in KRS 164.530, and to do all such other acts and things as may be necessary or desirable to implement the provisions of said regional compact efficiently and impartially for the benefit of all citizens of the Commonwealth.

(2) In its participation in the regional compact, or in any other regional plan having a similar purpose, the Commonwealth of Kentucky shall not erect, acquire, develop or maintain in any manner any educational institution within its borders to which negroes will not be admitted on an equal basis with other races, nor shall any negro citizen of Kentucky be forced to attend any segregated regional institution to obtain instruction in a particular course of study if there is in operation within the Commonwealth at the time an institution that offers the same course of study to students of other races.

164.947. Regulations and procedures for licensing of colleges by council on higher education.--(1) The council on higher education by regulation shall adopt standards and procedures for licensing of col-

leges to insure that the programs of preparation are comparable to the generally accepted standards of collegiate instruction with respect to faculty, curriculum, facilities, and student cost and that there is full disclosure with respect to the philosophy and purposes of the institutions and their capacity to fulfill these objectives.
